

AMENDMENTS TO THE CLAIMS

1 (currently amended) An apparatus for displaying images comprising a TV receiver operable to display at least one image~~which displays images~~ from a recording medium; and a remote controller operable to control~~which controls~~ the TV receiver;

wherein the TV receiver comprises:

a media insertion means for inserting the recording medium;

a media control means for forming a display image list, based on image information from the recording medium, when detecting insertion of the recording medium into the media insertion means;

a first display-image-list storage means for storing the display image list;

a first display means for displaying at least one of the image and image information~~an image~~; and

a first control means for transmitting the display image list and the image stored in the recording medium to the remote controller, and for, when receiving control information from the remote controller, outputting at least one of the image and image information~~the image~~ from the recording medium to the first display means; based on the control information and the display image list stored in the first display-image-list storage means; and

wherein the remote controller comprises:

a second display-image-list storage means for storing the display image list;

a second display means for displaying at least one of the image and image information~~an image~~; and

a second control means for, ~~when receiving the display image list from the TV receiver,~~ making the second display-image-list storage means store the display image list when receiving the display image list from the TV receiver, and for, ~~when receiving control information from a user,~~ transmitting the control information to the TV receiver when receiving the control information from a user, and for outputting at least one of the image and image information received~~the image~~ from the TV receiver~~recording medium~~ to the second display means; based on the control information and the display image list stored in the second display-image-list storage means.

2 (currently amended) The apparatus for displaying images according to claim 1,
wherein the second control means, when receiving a display image list from the TV receiver, outputs a thumbnail image as of the image from the recording medium to the second display means, based on the display image list.

3 (currently amended) The apparatus for displaying images according to claim 2, wherein
the second display means displays the thumbnail ~~of an~~ image from the recording medium two dimensionally by putting a time period on one of a vertical axis and a horizontal axis, and a photography location on an other axis.

4 (currently amended) A method for displaying images ~~forecomprising~~ a TV receiver operable to display at least one image ~~which displays images~~ from a recording medium; and a remote controller operable to control ~~which controls~~ the TV receiver, said method comprising:

~~wherein the TV receiver comprises the steps of:~~

~~inserting the recording medium;~~

forming a display image list, based on image information from the recording medium, when detecting insertion of the recording medium into the TV receiver;

storing the display image list in the TV receiver;

transmitting the display image list from the TV receiver to the remote controller;

transmitting the image stored in the recording medium to the remote controller;

and

displaying on the TV receiver at least one of the image and image information stored in an image ~~from~~ the recording medium, when receiving control information from the remote controller, based on the control information and the stored display image list ~~stored; and~~

~~wherein the remote controller comprises the steps of:~~

storing the display image list received ~~when receiving the display image list~~ from the TV receiver in the remote controller; ~~and~~

transmitting, when receiving control information from a user, the control information to the TV receiver; ₃ and

displaying on the remote controller at least one of the image and image

~~information received the image from the TV receiver recording medium,~~ based on the control information and the display image list stored.

5 (currently amended) The method for displaying images according to claim 4,
wherein, ~~in the remote controller, the step of displaying on the remote controller~~
~~comprises displaying the image from the recording medium displays a thumbnail image as of the~~
image from the recording medium.

6 (currently amended) The method for displaying images according to claim 54,
wherein, ~~in the remote controller, the step of displaying on the remote controller~~
~~comprises displaying the image from the recording medium displays a thumbnail of the image~~
from the recording medium two dimensionally by putting a time period on one of a vertical axis
and a horizontal axis, and a photography location on an other axis.

7 (new) The method for displaying images according to claim 4, further comprising
deleting the display image list stored in the remote controller when detecting extraction
of the recording medium from the TV receiver.

8 (new) The apparatus for displaying images according to claim 1,
wherein the second control means deletes the display image list stored in the second
display-image-list storage means when detecting extraction of the recording medium from the
media insertion means.
